Conversational

Francisco Cristina
Frontend **/** Full-stack Developer

About Me

I'm a career-switcher who transitioned from audio engineering to web development, bringing the same dedication, clear communication, and proactive mindset I honed in studios and freelance work. I've built a wide range of projects, from frontend interfaces to full-stack applications, while sharpening my skills through professional courses and coding exercises. My goal is to join a development team where I can grow as a frontend or full-stack developer, combining creative thinking with a strong work ethic.

Projects

Original Projects

- Portfolio Website: Responsive, one-page portfolio to showcase projects, skills, and design sensibility. Designed in Figma, built with React and TailwindCSS

- Capoot: A capo calculator web app that transposes chord progressions into open chords. Designed in Figma, built with vanilla JavaScript and Bootstrap

Full-Stack Applications

- Campground Review Platform: CRUD app where users can create, edit, and review campgrounds. Includes user authentication, image uploads, and interactive maps. Built as a RESTful application with Node.js, Express, and MongoDB

Frontend Projects

- Completed 50+ Frontend Mentor projects
- Focused on responsive layouts, state management, dynamic DOM manipulation, and working with external APIs
- Selected projects include:
  - React & Tailwind CSS: Weather App, E-commerce Project Page, Interactive Comments Section
  - Vanilla JS & Bootstrap: Crowdfunding Platform, Product List with Cart

Work Experience

Audio Engineer (Post-Production Studios & Freelancer)

Lisbon, Portugal | 2015 - 2025

- Worked on dubbing and commercial projects for global brands such as Disney, Netflix, and YouTube
- Handled full audiobook production workflow for clients including Forbes Books and Macmillan
- Adapted quickly to new tools and workflows, demonstrating technical flexibility
- Worked directly with clients, directors, and talent
