Francisco Cristina

Frontend / Full-stack Developer

About Me

I'm a career-switcher who transitioned from audio engineering to web development, bringing the same dedication, clear communication, and proactive mindset I honed in studios and freelance work. I've built a wide range of projects, from frontend interfaces to full-stack applications, while sharpening my skills through professional courses and coding exercises. Since the beginning of 2026, I've been working in the financial sector, contributing to the development of web-based software solutions for banks and financial institutions.

Work Experience

Junior Web Developer ([Innovation Makers](#))

Remote, Portugal | 2026 - Present

- Contributing to the development of web applications using Vue.js and its ecosystem (Vue Router, Vuex, Pinia)
- Working on internal tools and applications for the financial sector, including banking-related platforms
- Collaborating on scalable and maintainable frontend architecture
- Adapting quickly to new tools, workflows, and project requirements in a professional environment

Audio Engineer (Post-Production Studios & Freelancer)

Lisbon, Portugal | 2015 - 2025

- Worked on dubbing and commercial projects for global brands such as Disney, Netflix, and YouTube
- Handled full audiobook production workflow for clients including Forbes Books and Macmillan

Projects

Original Projects

- [Portfolio Website](#): Responsive, one-page portfolio to showcase projects, skills, and design sensibility. Designed in Figma, built with React and TailwindCSS

Frontend Projects

- Completed 50+ [Frontend Mentor](#) projects
- Focused on responsive layouts, state management, dynamic DOM manipulation, and working with external APIs

Full-Stack Applications

- [Campground Review Platform](#): CRUD app where users can create, edit, and review campgrounds. Includes user authentication, image uploads, and interactive maps.
